The diagram illustrates the accounting processing method for an electronic appliance. It begins with an "ELECTRONIC APPLIANCE" box, which leads to a "REALIZATION OF SERVICE" oval. Below the appliance box is a large box labeled "ACCOUNTING PROCESSING METHOD". Inside this box, there are two main components: a "CALCULATION FORMULA STORAGE MEANS" box and an "ACCOUNTING FEE CALCULATION STEP" box. The "CALCULATION FORMULA STORAGE MEANS" box contains a "CALCULATION FORMULA FOR CALCULATING ACCOUNTING FEE FOR USAGE OF ELECTRONIC APPLIANCE" box. An arrow points from the "CALCULATION FORMULA STORAGE MEANS" box to the "ACCOUNTING FEE CALCULATION STEP" box. The "ACCOUNTING FEE CALCULATION STEP" box is connected to a vertical line of dots, which in turn connects to the "ACCOUNTING FEE CALCULATION STEP" box. An arrow points from the "ACCOUNTING FEE CALCULATION STEP" box to the "ELECTRONIC APPLIANCE" box. Additionally, an "INFORMATION ON USAGE" box is connected to the "ACCOUNTING FEE CALCULATION STEP" box by an arrow.
